

DRIVING ECONOMIC GROWTH

FOR GREATER LINCOLNSHIRE

ANNUAL REPORT
2017-18

FOREWORD FROM THE CHAIR

Since our last conference in October 2017, it has been a busy year, and I am delighted to introduce the Greater Lincolnshire LEP's Annual Report for 2018, which once again captures the scale and variety of the work undertaken by the LEP with our local partners and stakeholders.

2017-2018 continued to be a year of uncertainty nationally, however Lincolnshire has gained a reputation for delivery, with many schemes and investments taking shape. We are well on the way with our £307 million growth plan, with schemes such as the Food Enterprise Zones, Skills Capital Programme, Housing programmes, and infrastructure across Lincolnshire going ahead.

This year we are driving some key national agendas from food to water to skills, as well as being recognised in Government as offering some unique opportunities for national pilots due to our expertise, knowledge, track record, and persistence! We have cemented key partnerships across the wider region – working as part of the Midlands Engine to ensure the Midlands plays a central role in driving the UK economy, and

adding value and scale to our own work in Greater Lincolnshire.

Our governance structures have been further strengthened and representation from ever more businesses has been influencing our strategies for growth and delivery. 126 men and women now sit on our boards, with over 100 of these from business.

This year has seen the launch of the new Business Growth Investment Fund, emerging work on a Local Industrial Strategy and a collaborative new marketing website www.marketinglincolnshire.com. Our Growth Hub has expanded with a focus on business scale-ups. We've launched the Team Lincolnshire Ambassador Programme, made strong progress on our three Food Enterprise Zones and been awarded two nationally important skills pilots.

We've delivered further Growth Deal funded schemes, including the highly acclaimed Lincoln Transport Hub which recently won the coveted East Midlands Civil Engineering Project of the Year award.

I hope this will inspire you to browse our highlights and achievements over the last 12 months and to visit our website to find out more and to get involved in shaping the vision for the Future of the Greater Lincolnshire Economy. As we update our Strategic Economic Plan and develop a Local Industrial Strategy during 2018 we will engage comprehensively with the business community. And we will continue to focus all our attention on making sure Lincolnshire is fully equipped to meet the challenges of the global economy and to take the opportunities that the emergence of new markets will bring.

The Growth Hub:
**OVER
8,000
BUSINESSES
ENGAGED**

Finally, I'd like to commend the commitment and quality of the LEP Board, who work tirelessly in a voluntary capacity to build, influence and drive the vision of the LEP, and to all our strategic board members and bodies who help to shape and deliver our agendas, attract funding and investment, and influence positive change. I would also like to acknowledge and thank Lincolnshire County Council and all of our local authority partners who provide a significant resource in supporting the LEP, by enabling operational functions and key programme delivery to occur efficiently and effectively.

Thank you.

URSULA LIDBETTER MBE

Chair | Greater Lincolnshire
Local Enterprise Partnership

AIMS

126
PUBLIC AND PRIVATE
**SECTOR
MEMBERS
SIT ON
LEP BOARDS**

The Greater Lincolnshire LEP is a partnership between the public and private sector to deliver sustainable economic growth. We support our businesses and act as a bridge with Government, to increase productivity and innovation, create new employment opportunities and develop the infrastructure that supports this.

Playing an important role in the UK economy, we are a successful accelerator of important schemes and projects and are respected by Government and endorsed by our businesses. We are driving economic change; we are a leading voice in agri-tech and food production; we are a powerful competitor in engineering; and we offer a compelling location to work, live and visit.

HIGHLIGHTS AND KEY ACHIEVEMENTS

STRATEGIC ECONOMIC PLAN 2015-2030

Our first SEP was published in 2014 with a refresh completed in the spring of 2016 to reflect a changing economic and political climate. It sets out how we can make the Greater Lincolnshire economy stronger, more productive and wealthier, and remains the principal strategy document for Greater Lincolnshire to provide evidence, attract funding and ensure a cohesive approach to economic development for all stakeholders. 2018 will see a further refreshed and updated SEP.

LOCAL INDUSTRIAL STRATEGY

The Government's Modern Industrial Strategy was published this year, aiming to rebalance the economy across the country and marking a sharp shift towards addressing low productivity, boosting wages and improving living standards nationwide.

LEPs are being asked to develop a Local Industrial Strategy (LIS) in partnership with Government, and will guide the focus on improving skills, increasing innovation, and enhancing infrastructure and business growth, and we have made a strong start this year in working with partners to ensure our LIS will become a tool for attracting new local and national funding streams.

ECONOMIC SHIFTS

Whilst the picture remains mixed, the latest official data available shows that Greater Lincolnshire's economy grew by £355m between 2015 and 2016ⁱ, a rise of 2%, and that all of our priority sectors out-performed those sectors nationally in terms of employment growth.ⁱⁱ

The number of registered businesses in Greater Lincolnshire grew by around 400 in the past year, whilst the number of self-employed and unregistered businesses rose by nearly 9%, with just under 72,000 people estimated to be self-employed in the area.

There have also been small increases in productivity levels across Greater Lincolnshire between 2015 and 2016, with average output currently standing at £27/per hour worked.

OUR ECONOMY HAS
GROWN

NATIONALLYⁱⁱ

INVESTMENT IN GROWTH

Securing over £307 million of transformational economic programmes to date across Greater Lincolnshire and kick-starting over 35 schemes to drive growth, create new jobs and vastly improve infrastructure, the Greater Lincolnshire LEP is enabling real, positive change.

We have over 80,000 businesses, which contribute £21 billion to the economy, confirming Greater Lincolnshire's place as one of the most significant economies within the Midlands Engine.

To date, our local Growth Funding is now £180m, meaning we are able to contribute towards a number of strategically significant schemes such as a Centre for Health Science and our three Food Enterprise Zones in Holbeach, Hemswell Cliff and

Grimsby, creating employment, land and buildings, specifically designed to support the growth and expansion of our agri-food/agri-tech clusters. Our £7.44m Skills Capital Investment Fund Programme is enabling the delivery of high-quality skills provision within our priority sectors, focusing on improving delivery and efficiency through digital technologies, including steps to improve technological infrastructure and service resilience.

A number of schemes including Boole Technology Centre, Bishop Burton College Riseholme Showground Campus and the £29m Lincoln Transport Hub have now been completed, and a further 18 projects are contracted and under way with several more at detailed design stage, evidencing that our investments are already making a difference to the local economy.

The first homes in our Unlocking Housing Programme in Boston are now occupied with 419 homes on 9 sites standing proud, and due to this success, the scheme has also been instrumental in developing new programme-based activity across other sectors.

The European Regional Development Fund (ERDF) has additionally helped to support over 17 transformational projects focused around our priority sectors, supporting activity in research and innovation initiatives, enhancing the use and access of ICT, making our SMEs more competitive, flood risk management and protecting or restoring our environment.

Greater Lincolnshire has also benefited from the Rural Development Programme for England, targeted at investment in business diversification, food

processing facilities, rural tourism, culture, heritage and rural services. Businesses have received over £1.85m of grant towards their projects and over £1.5m of grant funding towards projects are currently being reviewed.

Furthermore, through European Social Fund (ESF) we created a range of new training projects which have already supported over 5,000 learners to gain the skills needed by employers, and to inspire young people on the diverse range of exciting careers that are available in our area and these are now running across Greater Lincolnshire.

With progress accelerating, many schemes are now completed or nearing completion, and are starting to have a significant impact on our sectors, housing need, and all infrastructures, to increase investment potential, business growth, confidence and productivity.

A full list of the schemes we are supporting across Greater Lincolnshire can be found on our website at www.greaterlincolnshirelep.co.uk/funding-and-projects

41
**TRANSFORMATIONAL
PROJECTS
BEING FUNDED
BY THE SLGF***

* Single Local Growth Fund

INVEST AND GROW FUND

The £9m Growing Places Fund (Invest & Grow) is a rolling infrastructure loan fund designed to kick-start stalled housing and commercial developments and held a balance by the end of this financial year of just over £2.5m. Of note this year was a loan contract made to Stokes Lawn Investment resulting in the delivery of The Lawn for uphill Lincoln, and a loan which supported the completion of the International Bomber Command Visitor Centre in Lincoln.

FEASIBILITY FUND

The Feasibility pot has to date contracted with eight projects. An award made last year to research the potential to collect verge cuttings and use them in anaerobic digestion to make clean energy has gone on to innovate a bespoke machine which is now out and about in our countryside cutting verges and is a great example of how a small fund can act as a catalyst to innovation and success.

BUSINESS SUPPORT

The business support function of the LEP (Business Lincolnshire Growth Hub www.businesslincolnshire.com) has been instrumental in making business-to-business introductions and supported businesses to accelerate their growth through accessing support programmes, skills training and funding and remains a vital free face to face advice service. This year, through new partnerships with professional intermediaries we have been able to deliver high profile professional events, including; the Manufacturing Conference; Digital Conference; Taming the Dragon; Visit Expo; Funding Fairs; Digital Symposium; Made in Lincolnshire Awards; Family Business Forum; and the Start Up and Grow Conference.

Business Lincolnshire continues to outperform many other LEP growth hubs, and is upheld as an exemplar of its type.

EMPLOYMENT AND SKILLS

This year saw our £18m ESF funded skills and training programmes go from strength to strength and extended to March 2019. Programmes such as Skills Support to the Workforce; Specialist Skills Advisor and Industry Educator are supporting businesses to meet their ambitions. Skills remains a high priority for the LEP as we help businesses prepare for future jobs, and we are delighted at the very recent announcement that new ESF funded projects are likely to be up and running supporting our businesses by April 2019 until at least 2021.

In October, our World of Work website was launched, built to help business share information with schools about jobs in local industry and sectors, challenging perceptions.

Our free to use tool is available at www.theworldofwork.co.uk. We also launched our agri-food sector career films, produced with the help of local businesses and available at the LEP's YouTube channel: www.youtube.com/channel/UCKRvCiLJ3E4Ze0EHsnl3bgA

In December the Greater Lincolnshire LEP was awarded two national pilots by the Department for Education. The Career Learning Pilot – only one of five to be awarded nationally - will be delivered and monitored across 2018-19. The Skills Advisory Panel (SAP) Pilot will help the LEP work more closely with Government on employment, skills and training and is a much welcomed initiative.

SECTOR DEVELOPMENT

Progress growing our priority sectors has been strong this year with programmes and funds to deliver a Skills Capital programme, Food Enterprise Zones, a Centre for Food Excellence, business support services through the Growth Hub and the launch of the new Business Growth Investment Fund.

This ensures that our businesses' growth ambitions are coordinated and met with access to finance, support to develop leadership and management, innovation support and access to a pool of skilled labour.

The agri-food sector has developed a solid relationship with Government and has hosted some very influential events both locally and at Westminster and we've further developed strategic links across departments to raise the profile of this sector with the aim of negotiating a specific Food Sector Deal with Government. Our LEP Chair, Ursula Lidbetter was chosen to sit on the Government's influential new Food and Drink Council. On the ground our Food Enterprise Zones in Grimsby, Hemswell Cliff and Holbeach have developed with Peppermint Park open for business.

Our Manufacturing Board has refreshed the Manufacturing Sector Plan and delivered

a sector specific conference, with another in the pipeline. The Visitor Economy Board has led work to develop a sector Investment Plan and a Place Marketing toolkit with plans for a second phase under way.

All sectors have also been focused on influencing and shaping the Local Industrial Strategy and influencing Government policy on automation, labour supply and trade as Brexit negotiations intensified.

EVENTS

2017 saw our biggest ever LEP annual conference and exhibition on the theme of automation and robotics which attracted over 400 business people to the Lincolnshire Showground in October.

We also delivered a successful food sector event in the House of Commons, a Manufacturing Conference, Local Industrial Strategy round tables, the Team Lincolnshire Ambassador Programme launch and representation at property and investment events at MIPIM UK and Cannes.

INWARD INVESTMENT

In support of the LEP and partners' efforts to raise the profile of Lincolnshire and to support foreign-owned businesses, partners have continued to work with the Department for International Trade (DIT) to respond to specific inward investment enquiries and to develop propositions to attract and retain foreign investment.

Over the year to March 2018, a total of 16 foreign investment successes in Greater Lincolnshire were ratified by the Department for International Trade. Of these, 15 had some element of assistance from either national or local partners. The total new jobs created are 498 FTE and investment of over £146 million.

TEAM LINCOLNSHIRE

Team Lincolnshire activity enjoyed a substantial boost this year. The Ambassador Programme is a private/public partnership with the purpose of attracting and supporting business investment to Lincolnshire through a team of like-minded individuals and businesses who are passionate about promoting Lincolnshire and through collaboration forming a stronger and more effective voice.

The programme has attracted some extremely positive publicity over a wide range of media which has helped raise our membership to over 59 members - and it is still growing. A members' page has been developed on our new website www.teamlincolnshire.com

A marketing toolkit www.marketinglincolnshire.com was also developed with the County Council. The toolkit is free to use, and is available to businesses so that all ambassadors have a coherent and compelling narrative to use to help to increase investment and attract more visitors and more money into the local economy.

FINANCIAL OVERVIEW

The LEP remains in a strong financial position and continues to operate a number of reserves to allow us to respond to external factors and deliver against our business plan priorities.

Core funding of £500,000 was made available from national Government for the financial year consisting of £250,000 utilised primarily for staffing costs, and £250,000 for operational expenditure covering company requirements, communication and events, sector support, and the implementation of the Growth Deal.

Within the year we received our third tranche of **Growth Deal** monies to the sum of £15,687,335 and currently hold contracts to the total spend value of £259 million

with an agreed grant contribution of £88 million **Single Local Growth Fund** thereby leveraging in a further £171 million of investment.

The Growing Places Fund (**Invest & Grow**) - our infrastructure loan fund designed to kick-start stalled housing and commercial developments, held a balance for loans at the start of the year of £2,571,624 with loans paid out and repayments received resulting in a net expenditure of £319,981 for the period.

The LEP **Feasibility Fund** of £375,982 has awarded 8 contracts to a value of £271,500.

EU Funding:
SUPPORTING
£18.1
MILLION
OF EUROPEAN
SOCIAL
FUNDING

We also received £40,000 from the department of Business, Energy and Industrial Strategy (BEIS) to support the LEP in developing both an evidence base and a specific Energy Strategy for Greater Lincolnshire and £30,000 from Lincolnshire County Council to enhance the work of the place marketing model in 18/19.

Since the launch of the **Greater Lincolnshire Growth Fund** in October 2017 - a LEP fund specifically designed to meet a gap funding need within our priority sectors - there has been significant interest in the fund and we anticipate projects coming forward over the following months.

Our Annual Financial Summary is available on www.greaterlincolnshirelep.co.uk

A white industrial robotic arm is positioned on the left side of the page, reaching towards a series of black cables hanging from above. The background is a light blue wall with a window.

GOVERNANCE

The LEP is governed by a Directors Board of 16 private and public sector members which is supported by a number of formal company boards alongside strategic boards focused on Skills, Water Management, Manufacturing, Innovation, Visitor Economy and Food.

126 experts and business leaders from the private sector now sit on our boards, helping to influence and shape the economic vision for Greater Lincolnshire directly from the business community. Lincolnshire County Council retains overall legal accountability for the Greater Lincolnshire LEP investment programme delivering the Accountable Body function.

The Government brought in new regulations this year which have further tightened our already robust governance, processes, procedures and transparency and we work closely with both our representatives and local Government representative from the Department for BEIS to maximise compliance.

Further details can be found in our Financial Report and in the Governance section on our website.

Our Annual Financial Summary is available on www.greaterlincolnshirelep.co.uk

FEATURED PROJECTS

HIGHLIGHT ON INFRASTRUCTURE

GRANTHAM SOUTHERN RELIEF ROAD

This £80 million large-scale infrastructure scheme will encourage growth in the town of Grantham and unlock delivery of the Southern Quadrant Sustainable Urban Extension. It will create a new distribution road linking the A1 with the A52, alleviating congestion issues in the town centre, improving town centre environment and air quality, and enhancing the visitor experience. Whilst opening up the development of quality employment sites bringing job creation to the town, it also directly unlocks the development of 3,500 new homes on the Southern Quadrant, and is the Single Growth Fund's largest allocation at £28 million.

"The major investment that has been secured for Grantham by local partners working together will really help us to deliver our ambitions to grow the economy in Greater Lincolnshire and attract new business and employment opportunities to our main towns. The new road will open up new housing and employment land, and also support new investment opportunities in the town centre, which will become a more attractive place to spend time visiting."

£180 MILLION TOTAL LOCAL
GROWTH
FUNDING
ACHIEVED TO DATE

LINCOLN TRANSPORT HUB

Bringing a brand new transportation hub to the City of Lincoln, this £29 million project supported by £13 million of LEP funding, has brought enhanced public realm and improved accessibility, whilst encouraging sustainable travel.

The central bus station combined with a revitalised transportation concourse, employment space, and a multi-storey car park, has delivered major city centre redevelopment and contributes to safeguarding the future of the High Street, by delivering a fully integrated, accessible and welcoming city centre to residents and visitors alike.

“This is a huge scheme that will bring equally huge benefits to all who live and work in Lincoln, and importantly to those who visit the city and invest in it as well. The scheme will have an enormous, positive impact on the city, helping to make travel easier and removing barriers that prevent growth.”

COUNCILLOR RIC METCALFE
LEADER OF CITY OF LINCOLN COUNCIL

SOUTH HUMBER INFRASTRUCTURE INVESTMENT PROGRAMME

This important £13.6 million project is creating substantial new industrial infrastructure to support the major South Humber ports, reduce environmental constraints, and provides the opportunity for significant growth in the area's key industrial sectors and their supply chains. The South Humber Industrial Infrastructure Plan is a major 15-year programme of investment that will enable large-scale economic growth.

It also identifies and delivers a series of linked sites where wetland habitats will be created and is supporting the ports of Immingham and Grimsby to grow, bringing additional value, business and jobs to the area. The Single Local Growth Funding allocation for this project is £4 million.

“We've been developing a number of projects designed to unlock growth across the south bank of the Humber. By investing in these strategic projects we'll help to make North East Lincolnshire more attractive to future business growth and investment.”

COUNCILLOR RAY OXBY
LEADER OF NORTH EAST LINCOLNSHIRE COUNCIL

HIGHLIGHT ON SECTORS

PEPPERMINT PARK INTERCHANGE (FEZ)

This gateway project - created to enable the Holbeach Food Enterprise Zone, is a programme of investment that will enable large-scale economic growth for this rural area. The scheme opens up business growth opportunities, improves the infrastructure - heavily relied upon by the agri-food sector and supply chains - and enables the development of nearly 25 acres of land suitable for high-quality commercial space, as well as approximately 100 acres of land for residential units to come forward promptly.

The scheme provides important employment opportunities for the food manufacturing sector and adjacent academic institutions that will open possibilities for research, training and knowledge transfer within an area that has now been designated as a Food Enterprise Zone.

This is a £3.45 million project attracting £2.1 million of Single Local Growth Funding.

“Agri-food and food manufacturing are of enormous importance to the county. In fact, the food sector is our third biggest sector and contributes £2.5 billion every year to the area's economy. By developing land for the Food Enterprise Zone, we want to support existing businesses, while also attracting those interested in investing and relocating to the county.”

COUNCILLOR COLIN DAVIE
LINCOLNSHIRE COUNTY COUNCIL

HIGHLIGHT ON SKILLS

BOSTON ENGINEERING, MANUFACTURING AND TECHNOLOGY CENTRE (EMAT)

One of the first recipients of the Skills Capital Programme, EMAT will receive £2.8 million towards a £4.9 million project to create an industry-driven training facility that will stimulate growth and productivity across engineering, manufacturing and agri-tech. The project is specifically designed to improve the skills and talent of the current and future workforce and to support key strategic sectors.

Twelve brand new courses will be created within the first two years and once fully established it will support an additional 600 learners per year in LEP priority sectors. The EMAT Centre will include industry approved workshops for practical skills development, teaching spaces, and an extension to existing construction provision and computing.

HIGHLIGHT ON BUSINESS SUPPORT

HAMMDEN CONSULTING provides software and technological solutions to small and large businesses. The company wanted to improve the marketing for the business and with the help of the Growth Hub, were able to identify the right funding, in the form of a revenue grant for brand and website improvements. Hammden was really pleased with how much support they could access through Business Lincolnshire, not only to gain grant funding but also to highlight networking groups, facilitate business relationships and offer ongoing support and action points for the future.

AMBER CARE in Market Rasen, is a domiciliary care provider offering health and social care. As a new start up, this family run business had very little practical experience in business management. Business Lincolnshire helped create a business plan, targets, back up plans and strategies and provided them with confidence in business management and helped them to identify their USP which has helped them focus their efforts and continue to grow their business.

“We’ve gained so much confidence in our business management, thanks to some fantastic adviser support.”

AMBER CARE

OTHER HIGHLIGHTS

THE LAWN - STOKES & SONS LTD

This exciting £2 million project to repair and refurbish the historically important Grade II* listed building in central Lincoln for occupation by Stokes, was supported by £600,000 of LEP loan funding. The project involved consolidating activities for a new head office, creating a 60-seat café and restaurant, roasterie area, managed business space, ground floor retail, and a performing arts venue. The scheme also accommodates ongoing expansion of the business, along with additional on-site training and catering services.

The extension of public car parking facilities and reconfiguration of landscape areas to enhance the profile of the site, have also been completed and the site is open for business, directly benefiting the uphill area and visitor economy.

“I’m very pleased that loan funding from the Greater Lincolnshire LEP has been able to help bring the historic Lawn complex back into full use.”

URSULA LIDBETTER
CHAIR OF THE GREATER LINCOLNSHIRE LEP

This is just a snapshot of the schemes we are supporting across Greater Lincolnshire.

A full list can be found on our website at www.greaterlincolnshirelep.co.uk/funding-and-projects

“Accessing this funding opportunity has enabled me to build the platform I needed to build brand awareness and generate more business!”

LISA HAMMOND-MARSDEN
HAMMDEN CONSULTING

“ Looking forward, the Greater Lincolnshire LEP will remain focused on our three core objectives: **TO PROMOTE** the economic interests of the area; **TO INFLUENCE** the investment plans of partners; and **TO DELIVER** local programmes.

This will benefit all in our economy, and continue to reach towards our ambitions of increasing the Greater Lincolnshire economy by £3.2 billion, creating new jobs, delivering new homes and supporting businesses.”

URSULA LIDBETTER, CHAIR, LEP CONFERENCE OCT 2017

NEXT STEPS

The Greater Lincolnshire LEP’s strong track record means that we are now in a phase of increased delivery, as illustrated in the projects featured.

Working with our local partners and stakeholders, the LEP will continue to work to ensure the development of a strategic project pipeline to take advantage of local and national investment streams and policy initiatives.

Focus areas of activity for 2018/19 include:

- > Development of our Local Industrial Strategy to include identification of unique areas of opportunity and a strong drive with Government to work with Greater Lincolnshire as a pilot rural area for the Local Industrial Strategies
- > Supporting marketing and delivery of the Food Enterprise Zones as the place to locate food and agri-tech businesses
- > Further developing the Growth Hub to offer rapid growth and scale-up business activity options
- > Delivering the Greater Lincolnshire LEP skills pilots
- > Continuing delivery of the important LEP Growth Deal projects and programmes
- > Increasing activity with our Team Lincolnshire Ambassadors to accelerate inward investment and place marketing promotion
- > Championing our priority sectors and themes
- > Raising the profile of Greater Lincolnshire
- > Case-making for post Brexit successor funds (UK Shared Prosperity Fund)
- > Driving our priorities within the Midlands Engine.
